Kampong Cham Provincial Health Department

SUMMARY REPORT

Dissemination Workshop on Standard Operational Procedure for Partner Notification Services and other form of Index Client Testing

On June 26, 2018, the National Center for HIV/AIDS, Dermatology and STD (NCHADS) in collaboration with US-CDC and FHI360-LINKAGES hosted a full-day workshop entitled The Dissemination of the national standard operation procedure for Partner Notification Services and Other Forms of Index Client Testing (PNTT) which take place at Kampong Cham Provincial Health Department. The workshop was part of the national strategic direction to optimize new case detection of HIV, led by NCHADS with technical and financial assistance from US-CDC and LINKAGES. The goal of the partner notification is to break the chain of HIV transmission by offering HIV testing services to persons who have been exposed to HIV and linking them to HIV treatment if positive; or prevention services if negative.

The purpose of the workshop was to bring together a variety of HIV stakeholders to learn about and identify opportunities for supporting and expanding the implementation of PNTT. The 120 (including 11 females) workshop participants represented over 50% of provincial health department (PHD), provincial HIV and STI program (PASP), operational district (OD) representative and ART team leader, and NGOs partners including CRS and its partners, US-CDC, USAID, LINKAGES, KHANA, and Chhouk Sar Clinic.

The workshop began with a short opening remark from Kampong Cham PHD Deputy Director, US-CDC Representative, and NCHADS Director. An expert presentation followed, including “summary national strategic approaches toward 90-90-90 target” by Dr. Kaeoun Chetra and Dr. Ngauv Bora, “progress result of the 90-90-90 achievement to-date” by Dr.

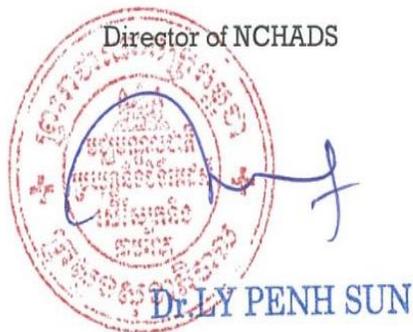

Ngauv Bora, “overview of PNTT SOP” by Dr. Toch Sarun, “key steps for offering and recording PNTT services” by Dr. Chan Sodara, “monitoring and evaluation of PNTT services” by Mr. Chea Chamnan and Mr. Nhim Dalen, and “CAA and PNTT implementation plan of CRS” by Dr. Noy Prophea.

Participants identified several key contextual factors of the PNTT SOP, including key critical steps for offering PNTT services to index client and how to record and report the PNTT efforts, to be taken into account when thinking about the future of the PNTT implementation.

Discussion at the workshop identified gap areas for PNTT implementation along with the key responsible person who will carry-out PNTT services and record data at the ART site, the needs capacity and skills for ART team and involved staffs at the ART site, and technical support from the national team. NCHADS will conduct the second PNTT dissemination workshop on July 2nd, 2018 at Kampong Chhnang Province and plan to conduct three-time of PNTT and CAA training of trainers (TOT) in mid-July and early August 2018 and step-down training in late August and onward.
